

Richmond House

Booklet designed and presented
by patients.

What is Richmond House?

Richmond House is a service for people who have a learning disability and or Autism.

They may also have a mental illness and may have committed a crime.

People who stay here are sectioned under the Mental Health Act 1983, amended 2007.

What is Richmond House?

Richmond House offers people therapy.

We design the therapy so it is suited to everyone's individual needs.

The therapy helps people to learn the skills they need to live in the community.

The therapy also helps to keep everyone safe.

Therapy is run by trained professionals like Psychologists and Occupational Therapists.

What is Richmond House?

At Richmond House we encourage everyone to be independent.

We also encourage people to take responsibility of their own care.

How do we work together?

We work with our Multi Disciplinary Team (MDT) to make care, treatment and support plans. In our MDT we have a Doctor, Nurses, a Psychologist, Occupational Therapist, Teacher, Art Therapist and a Speech and Language Therapist.

The MDT works closely with our families, friends, carers and local commissioners.

Our staff team provide outstanding care and are dedicated to support our needs.

How do we work together?

Richmond House is a step down service from the secure hospital care to community living. We are proud of our environment which is welcoming, homely and safe.

As patients our team supports us to recognise and respond to our individual needs early.

We follow a Positive behaviour Support strategy, supported by a rehabilitation model of care, a clinical model which focuses on adapted DBT skills system of therapy and the MHA: CPA process.

What do we do at Richmond House?

We have more chances to go into the community. For example, we volunteer in the community and have real work opportunities.

We work with our MDT and external Support Team/commissioners to plan our Discharge.

As patients we follow 'Our Choices' and promote respect, rights, inclusion, participation, privacy, and dignity to prepare us for independence in the community.
