

## Services for the NHS

# Rehabilitation and recovery services

**Priory provides rehabilitation and recovery (R&R) services for those who are experiencing complex mental health problems and require specialist assessment, treatment and support to re-integrate into the wider community. We aim to enable our patients to develop and, most importantly, sustain the skills and confidence needed to achieve more independence and a greater quality of life outside of hospital.**

The values of hope, therapeutic optimism, agency, opportunity and inclusion are recovery concepts that are central to our services.

Priory ensures all R&R services reflect NHS guidelines, in order to support the need for clarification and standardisation of rehabilitation care using a two-level approach.

## Service overview

Priory's level 1 and level 2 services focus on addressing and minimising symptoms and functional impairment, with an emphasis on achieving as much individual autonomy and independence as possible. This includes optimal management of symptoms, promoting daily living and meaningful occupation, screening for physical health problems, promoting healthy living and providing support and evidence-based interventions to support families and carers.

Our nationwide network of specialist rehabilitation facilities provide support within the following specialisms:

- + High dependency rehabilitation units
- + Community focused rehabilitation
- + Neuropsychiatry, older age and dementia including Huntington's and Korsakoff's support
- + Specialist personality disorders including DBT programmes
- + Specialist learning disability rehabilitation/autism care
- + Transitional living services for young people and young adults
- + Bespoke therapeutic placements

## Our outcomes

We work hard to involve individuals in their care and aim to provide supportive services which make a positive difference to their behaviours and future lives. We are delighted that the vast majority of our rehabilitation and recovery patients speak positively about their experience with Priory.

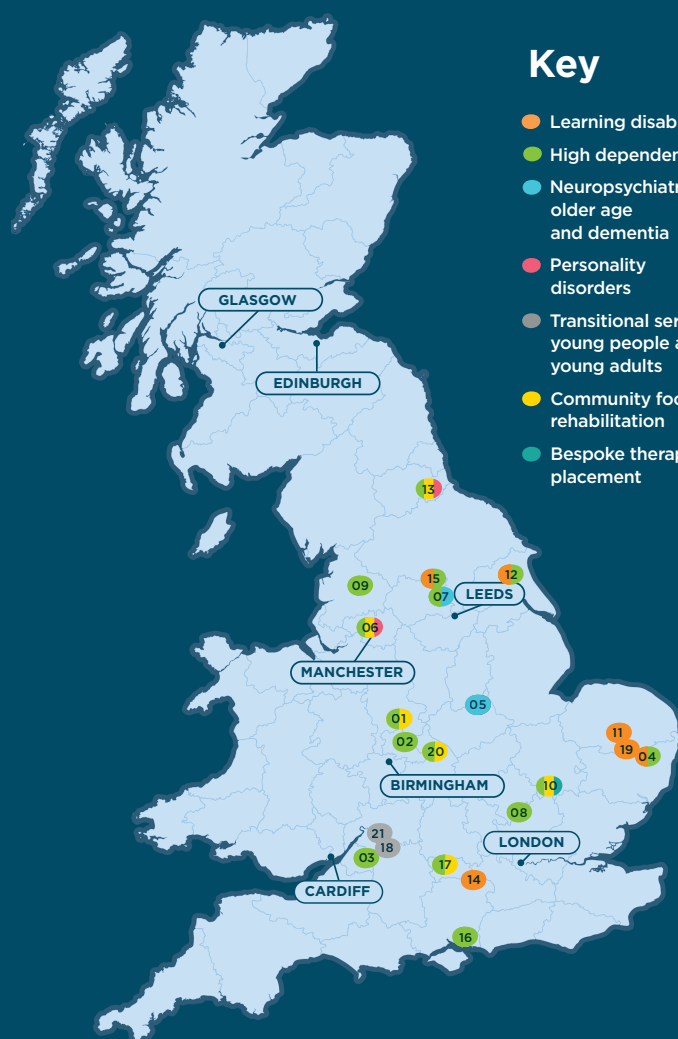

**Live your life**

Our comprehensive multidisciplinary teams provide evidence-based treatment programmes across a range of conditions. Our treatment plans are tailored to the needs of each individual and aim to take into account mental, physical, educational and spiritual needs.

We are regularly reviewed by the Care Quality Commission (CQC), ensuring that we meet national standards for quality of care.
