

Kemple View

Locked rehabilitation and secure mental health services

Kemple View offers locked and secure services for men aged 18 years and older with mental illnesses and personality disorders. We focus on recovery and promoting independent living and required skills, to maximise rehabilitation for the men that we care for.

Kemple View is set in beautiful grounds with views over the Ribble Valley in Lancashire. We also offer a horticultural area to help promote recovery in a peaceful environment.

Service overview

Kemple View is a 90-bedded service with the following split:

- **56-bedded low secure service across four wards**
- **34-bedded locked rehabilitation service across two wards**

Within Kemple View there is dedicated and purpose-built ward offering a low secure forensic specialist older age service for patients over the age of 50. A higher profile is given to this patient group's physical healthcare, complex psychiatric needs and where required, mobility and daily living aids.

We focus on promoting practical skills needed to be a successful member of the community.

Patient profile

Kemple View is suitable for patients that fit the following profile:

- **Men aged 18 years and over (with a specific unit for older males)**
- **Mental illness and/or personality disorder**
- **Detained under the Mental Health Act**
- **With complex needs, history of forensic or challenging behaviour and/or previously failed placements**
- **Older adults with mental illness with deteriorating physical and/or cognitive needs**
- **Substance misuse issues**
- **Problematic sexual behaviour**

Treatment programme

Kemple View has a variety of bespoke, award-winning, evidence-based therapies available to patients including:

- **Dialectical behaviour therapy (DBT)**
- **Cognitive behavioural therapy (CBT)**
- **Offence focused interventions**

All therapies can be delivered in a group or on an individual basis, and are tailored for patients with mental disorders and differing cognitive abilities, to ensure that responsive issues are addressed. Lack of motivation and lack of insight are specifically identified as a focus for therapy. We offer evidence-based individualised treatment, which includes, for example, an integrated treatment model for mental disorder and substance misuse patients. We also focus strongly on problematic sexual behaviour and the use of violence and aggression as part of this.

Across all wards, the occupational therapy service has a specific focus on the development and establishment of functional skills ranging from:

- **Promoting independence in personal care tasks**
- **Developing maximum competence in more complex tasks such as managing a budget or engaging in work type occupations**

Volunteer, work and recreation activities

Kemple View benefits from access to a wide range of community-based voluntary experiences supported work and recreational activities.

These therapeutic interventions are delivered within a facilitating environment, using positive psychological approaches to ensure effective learning and behavioural change. Kemple View is an accredited centre of excellence for RAID (Reinforce Appropriate, Implode Disruptive), and is also a Mindful site.
