About Suttons Manor Hospital

Services at Suttons Manor focus on the treatment and rehabilitation of mentally disordered men with mental illness and/or personality disorder often referred to our care by the criminal justice system.

Our older age service provides care and treatment tailored to the individual by our experienced multidisciplinary team with expertise in age-appropriate physical and mental healthcare. Our aim is to move the resident along a specific care pathway that will lead to maximum recovery, improved quality of life and appropriate referral or discharge when appropriate.

What is a Recovery College

It is a place where patients work together as trainers and students to further their recovery, with staff support as required.

A recovery college is an environment where you can discover your potential and learn the skills to develop and maintain your self-management.

The recovery college compliments any therapeutic programs you may be involved and have an educational focus

PRIORY

Who is it for?

At the moment it is for Suttons Manor
Hospital patients.

In the future we hope ex patients and
members of the wider community will join us.

What you can gain and achieve

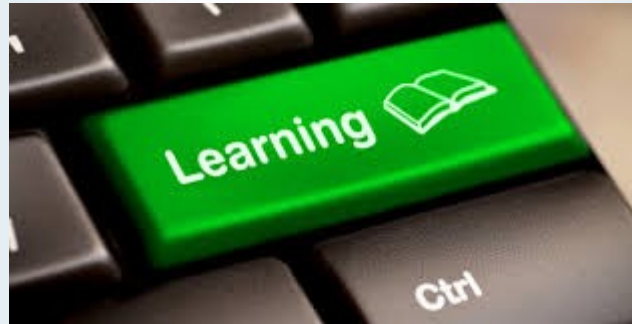

You learn how to be independent, have empowerment and gain new skills in your chosen course, as student or trainer.
