

Priory's Brain Injury Services

Responding to COVID-19

Across Priory's Brain Injury Services, we care for and provide rehabilitation to vulnerable people who have either experienced an acquired or traumatic brain injury or have a progressive neurological condition.

As the COVID-19 outbreak has unfolded over 2020, our services across the country have been busy adapting their programmes to ensure that patients continue to receive the best possible treatment for them, in a safe and effective way.

Continuing care throughout COVID-19

Our Brain Injury Services provide care and rehabilitation to a particularly vulnerable group of people. We have put measures in place to ensure we continue to provide safe and effective care, focused on individual empowerment.

Telephone and video conferencing assessments

PPE and infection prevention and control measures

On-site activities

Keeping in touch with loved ones

Hear from our teams

Elm Park

In this video Maria Goodman, Hospital Director at Elm Park in Colchester, one of our neurobehavioural services, discusses how her team has adapted to support their current patients and embraced technology to conduct assessments and admit patients.

Highbank's Elton Unit

Elton Unit, near Bury, provide care for adults with a brain injury. The team have incorporated creative and innovative ideas into their programme to ensure patients are still able to enjoy recreation activities and connect with families despite the COVID-19 pandemic.
