Priory

Priory's neurorehabilitation and neurological services

Priory's specialist neurorehabilitation and neurological services provide support across rehabilitation, recovery, transition and longer-term neurological care, for a wide range of neurological conditions including acquired brain injury (ABI) and progressive neurological conditions (PNC). We support those who have need for neuro physical rehabilitation, neuro behavioural rehabilitation, and complex neurodisability management.

The breadth of our services across the UK allows a comprehensive option of care pathways.

Our specialist care pathways

Priory's neurorehabilitation and neurological care services provide a range of pathways according to an individual's clinical needs, rehabilitation potential, level of dependency and longer-term goals.

Individual pathways include:

+ Active/specialist neurorehabilitation
+ Neurobehavioural rehabilitation and support
+ Slow-stream and longer-term rehabilitation
+ Complex neurological rehabilitation and PDOC
+ Transition, step-down and community reintegration
+ Longer-term specialist neurological care

Our approach

Our rehabilitation programmes aim to maximise individual's independence, quality of life and functional potential.

We include service users, their families and carers in treatment and in developing individualised programmes of care.

Our ABI care facilities are designed to provide the optimum environment and services are provided in:

+ Hospital settings
+ Nursing home services
+ Residential services
+ Transitional living services

Our specialists work together to share learning and best practice and our aim is to maximise independence and functional potential, whilst enhancing quality of life.

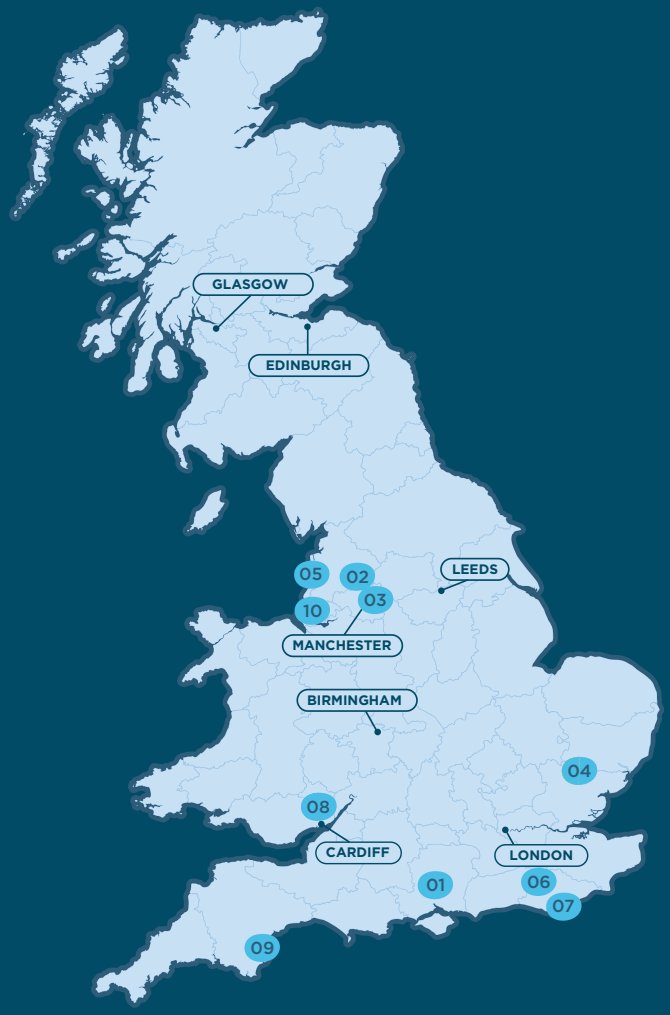

Neurophysical care
