

Priory Hospital Altrincham

Cognitive behavioural group therapy for bipolar disorder

Priory Hospital Altrincham's cognitive behavioural therapy (CBT) group is designed to support and treat individuals diagnosed with bipolar.

Participants will be introduced to the CBT model of care which will outline the programme but also explain how more positive behaviours can be maintained in future.

Programme overview

The programme includes:

- + Building motivation and combating hopelessness around making change
- + Education regarding onset and causes of bipolar disorder
- + Assessing individual characteristics of depressed, stable and manic states
- + Identifying early, mid and late warning signs of changing mood states and making action plans to manage these, including a crisis management plan
- + Cognitive and behavioural strategies to cope with depression and mania
- + Robust relapse prevention planning
- + Two friend or family sessions to offer guidance to your support network and look at how they can better help you manage your bipolar

What to expect

- + 2 hour group sessions
- + Wellness groups
- + Consultant psychiatrist appointments scheduled separately if needed
- + Practical and learning-based curriculum

About Priory Hospital Altrincham

Set within a beautifully-appointed manor house, Priory Hospital Altrincham is located in a tranquil Cheshire setting, complete with landscaped gardens. The hospital provides a peaceful, welcoming and homely feel, and offers the perfect environment for adults and young people to receive specialist treatment for a range of mental health challenges.

Our therapists are committed to listening to your concerns with patience and understanding, and working with you in a collaborative way to address your unique challenges, improve your wellbeing and pave the way towards lifelong recovery.
